

Antibacterial inorganic ceramics and its production technology

Patent Number: CN1279222
Publication date: 2001-01-10
Inventor(s): LI JIANFEI (CN)
Applicant(s): JIANFENG CERAMICS CO LTD JINHU (CN)
Requested Patent: CN1279222
Application Number: CN20000119530 20000731
Priority Number(s): CN20000119530 20000731
IPC Classification: C04B41/85; C04B41/86
EC Classification: C04B41/50M
Equivalents:

Abstract

An antibacterial inorganic ceramics is prepared from antibacterial active components including nm silver, nm silicon oxide and nm alumina sol through proportioning, stirring, regulating pH value, laying aside, drying, ball grinding the mixture of antibacterial material and enamel material, coating on surface of ceramics and sintering. Its advantages include simple process, no decolouring, and high antibacterial power.
